

# Chronic Fatigue Syndrome

Chronic Fatigue Syndrome or CFS is a condition of prolonged and often severe tiredness or excessive weakness or fatigue, which is usually not relieved simply via rest.

## **Possible Causes and Contributing Factors:**

- Viral infection (Mono., Hepatitis, Epstein-Barr, CMV, etc)
- Candida or other fungal infections
- Parasites
- Carbohydrate sensitivity
- Magnesium deficiency
- Heavy metal body burden
- Digestive dysfunction resulting in “leaky gut syndrome”
- Impaired detoxification
- Hypoglycemia
- Hypothyroidism
