

Gastric or Duodenal Ulcers

Gastric or peptic ulcers are erosions in the stomach or duodenum, which is the first part of the small intestine.

Possible Causes and Contributing Factors:

- Excess or insufficient production of HCL
- Biliary and/or pancreatic dysfunction
- Bacterial infection (helicobacter pylori)
- Pyloric or ileocecal valve dysfunction
- Stress (physical or psychological)
- Inflammation from food allergy/sensitivity resulting in ulceration
- Aspirin abuse, severe trauma or chronic illness
