

Infant Digestive Problems (Constipation, Diarrhea, Colic)

Possible Causes and Contributing Factors:

- Milk or formula sensitivity
- Breast feeding mother has poor diet (excess refined carbohydrates, dairy, refined grains, alcohol)
- Thymus hypo-function
- Bacterial imbalance in bowel
- Viral or bacterial infection
- Parasites
- Physiological problem in bowel (kink, bleeding, etc)

Suggested Dietary Changes:

- Attempt a different formula (goat's milk, soy)
- Change mother's diet – eliminate refined carbohydrates, alcohol, fried foods, processed foods, hydrogenated fats and oils, caffeine
- If infant is taking water, make sure it is pure water only – same for mother if breastfeeding
