ABOUT CANDIDA

Candida albicans is a type of pathogenic yeast-like imperfect fungi. Historically speaking, the leading cause of yeast infections would be improper diet. Candida albicans mainly thrive on sugar and other refined or processed foods. Thus, by removing their primary food source, the over-growth of these fungi tend to be lessened. Candida albicans is single-celled fungus yeast that under normal circumstances exists within the human body. In certain situations, yeast can grow out of control and invade the human host creating many health problems. Certain factors, such as prolonged antibiotic use, parasitic infection, uncontrolled diabetes, hormonal birth control use for 6+ months, steroid use, ulcer medications, smoking, HIV, and impaired immune systems make persons more susceptible to yeast infections.

SYMPTOMS OF CANDIDA

- Chronic digestive problems
- Bloating
- Diarrhea
- Rectal itching/burning
- Heartburn
- Brain fog
- Sugar cravings
- Autoimmune disease
- Chemical sensitivity
- Fungal skin/nail infections
- Vaginal yeast infections
- Urinary tract infections
- Loss of libido
- Irritability/depression
- Memory problems

THE CANDIDA SOLUTION

PHASE I: (Month 1 and 2)

• CandiKill II

Take 4 capsules in the morning

• SBC II

Take 3 capsules in the evening

• Liver/Galbladder Tincture

2 droppers in the morning with CandiKill II

2 droppers in the evening with SBC II

PHASE II: (Month 3 and 4)

• CandiKill II

Take 4 capsules in the morning

• Super Biotics II

Take 2 capsules at night

• Lymphatic Tincture

Take 2 droppers in the morning with CandiKill II

Take 2 droppers in the evening with Super Biotics II

DIETARY SUGGESTIONS

One important part of treatment is diet! Dietary changes are crucial in reversing Candida overgrowth. Diet is strict for the first month, moderate the second month, more lenient after that depending on symptoms. Diet is tailored to the severity of the case. Low carb, low yeast diet: no fruit, sugars, barley malt, honey, syrup, alcohol, caffeine, sweet potatoes, pickled foods, yeast, fermented foods, mushrooms, cheese, vinegar, soy sauce, Brewer's yeast, and smoked foods. Don't eat cooked food more than 2 days old. Avoid all sources of sugar (cake, pie, ice cream, cookies, vinegar, alcohol, honey, fruit and fruit juice).

FOOD

	Yes	No
Meat and Fish	Organic or free range, canned (water-packed), frozen, or fresh fish; chicken; turkey; wild game; lamb, beef	Pork, cold cuts, hot dogs, sausage, canned meats, shellfish
Fruit	No fruit for at least 4 weeks, first types to reintroduce are apples and pears	Juice or fruits
Vegetables	All fresh raw, steamed, sautéed, juiced, or roasted	Corn, tomato, creamed vegetables
Starch	Limited: brown rice, sweet potatoes, yams, whole grain pasta, oatmeal	Wheat, corn, barley, spelt, kamut, rye; all gluten-containing products: bagels, breads
