Candida albicans
Fungal infections
Yeast infections
Digestive Tract
CandiKill II was formulated to target Candida albicans and other fungal infections. Candida infections can produce various symptoms depending on the area of infection. Once you and your healthcare practitioner have determined that you are suffering from a candida infection, CandiKill II can play an important role in reducing this type of infection. Dietary changes are also crucial in reversing Candida overgrowth, which your doctor will discuss with you. It is usually suggested that one take a good quality probiotic while trying to eradicate Candida, such as SBC by Nutritional Frontiers.

About the Ingredients

Berberine- is an alkaloid (type of plant constituent) derived from various wild plants with yellow roots, such as goldenseal, Oregon grape root, barberry, and goldthread. Studies in vitro, in animals, and in humans have demonstrated that berberine exhibits broad spectrum anti-fungal and anti-bacterial activity. Berberine has also been shown to be useful in the case of anti-fungal resistance. In other words, in the same way that overuse of antibiotics has resulted in antibiotic-resistant strains of bacteria, so there are anti-fungal-resistant cases of Candida infection.

Caprylic acid- is a medium-chain fatty acid commonly included in natural anti fungal supplements. Some studies have shown that caprylic acid inhibits Candida growth. A 2012 Japanese study in mice demonstrated that caprylic acid was effective against both mycelial growth and yeast-form growth of Candida albicans in oral candidiasis. Caprylic acid may have some antibacterial properties as well.

Grapefruit seed extract- was discovered by an American immunologist in 1980. It has been used to combat Candida and other infections. An in vitro study conducted in Poland showed that grapefruit seed extract exerted potent antifungal activity against various Candida yeasts strains.

Garlic- has been revered for thousands of years as a culinary and medicinal plant. Garlic is mentioned in the Bible, the Talmud, and by ancient physicians such as Hippocrates, Galen, Pliny the Elder, and Dioscorides. Garlic is often included in anti-microbial formulas. Modern research confirms its traditional use in fighting infections. Garlic also shows promise in preventing atherosclerosis, lowering cholesterol, and reducing excessive platelet adhesion.

Pumpkin Seed- With a wide variety of nutrients ranging from magnesium and manganese to copper, protein and zinc, pumpkin seeds are nutritional powerhouses wrapped up in a very small package. Because these are high-fiber seeds, they’re able to boost your fiber intake, helping you reach the ideal amount of 50 grams per 1,000 calories consumed. Pumpkin seed oil has been found to exhibit anti-inflammatory effects. One animal study even found it worked as well as the anti-inflammatory drug indomethacin in treating arthritis, but without the side effects. (8)

SUPPLEMENT FACTS

Serving Size 3 Capsules

Serving Per Container 30

Amount Per Serving

Berberine (as Berberine HCl) 400 mg
Caprylic Acid (as sodium caprylate) 300 mg
Olive (Olea europaea) Leaf Extract 333 mg
Grapefruit (Citrus x paradisi) Seed Extract 250 mg
Garlic (Allium sativum) Bulb 250 mg
Pumpkin Seed 200 mg
Thyme (Thymus vulgaris) Aerial Extract 100 mg
Oregano (Origanum vulgare) Aerial Extract 100 mg
Sodium 45 mg

Other Ingredients: Vegetable cellulose, water and microcrystalline cellulose

Suggested Use: As a dietary supplement, take 3 capsules per day in the AM, or as directed by your healthcare practitioner.

Warning: If pregnant or nursing, consult your healthcare practitioner before taking this product.
