antimicrobial effects of thyme extract and thyme essential oil. Various studies have examined and verified the effectiveness of thyme for treating people with bronchitis, cough, upset stomach, whooping cough, and infections. Thyme Aerial Extract (Thymus vulgaris) has many traditional medicinal uses: herbalists have used thyme for dietary intake, helping you reach the ideal amount of 50 grams per 1,000 calories consumed. Pumpkin Seed - With a wide variety of nutrients ranging from magnesium and manganese to copper, protein and zinc, pumpkin seeds are nutritional powerhouses wrapped up in a very small package. Garlic Bulb (Allium sativum) has been revered for thousands of years as a culinary and medicinal plant. Garlic is mentioned in the Bible, the Talmud, and by ancient physicians such as Hippocrates, Galen, Pliny the Elder, and Dioscorides. Garlic is often included in anti-microbial formulas. Modern research confirms its traditional use in fighting infections. Garlic also shows promise in preventing atherosclerosis, lowering cholesterol, and reducing excessive platelet aggregation. Olive Leaf Extract (Olea europaea) has been used by herbalists and in traditional folk medicines for many years to treat a variety of conditions. The olive tree is a small, evergreen tree native to the Mediterranean region but is cultivated world-wide. Thyme (Thymus vulgaris) Aerial Extract (Thymus vulgaris) is derived from the fragrant thyme plant, which is probably best known for its culinary use. Thyme also has many traditional medicinal uses: herbalists have used thyme for treating people with bronchitis, cough, upset stomach, whooping cough, and infections. Various studies have examined and verified the antimicrobial effects of thyme extract and thyme essential oil.

Oregano Aerial Extract (Origanum vulgare) extracted from the leaf of oregano has been shown to have antifungal action, according to in vitro studies. In particular, one study showed benefits of oregano oil specifically against Candida albicans. Oregano is prized for both its culinary and medicinal applications, and is native to the Mediterranean region but is cultivated world-wide.

**About the Ingredients**

**Berberine** is an alkaloid (type of plant constituent) derived from various wild plants with yellow roots, such as goldenseal, Oregon grape root, barberry, and goldthread. Studies in vitro, in animals, and in humans have demonstrated that berberine exhibits broad spectrum anti-fungal and anti-bacterial activity. Berberine has also been shown to be useful in the case of anti-fungal resistance. In other words, in the same way that overuse of antibiotics has resulted in antibiotic-resistant strains of bacteria, there are also antifungal-resistant cases of Candida infection.

**Caprylic Acid** is a medium-chain fatty acid commonly included in natural antifungal supplements. Some studies have shown that Caprylic Acid inhibits Candida growth. A 2012 Japanese study in mice demonstrated that Caprylic Acid was effective against both mycelial growth and yeast-form growth of Candida albicans in oral candidiasis. Caprylic Acid may have some antibacterial properties as well.

**Olive Leaf Extract (Olea europaea)** has been used by herbalists and in traditional folk medicines for many years to treat a variety of conditions. This product is not intended to diagnose, treat, cure, or prevent any disease.

**Grapefruit Seed Extract (Citrus x paradisi)** was discovered by an American immunologist in 1980. It has been used to combat Candida and other infections. An in vitro study conducted in Poland showed that grapefruit seed extract exerted potent antifungal activity against various Candida species. Garlic Bulb - show benefits of oregano oil specifically against Candida albicans. Oregano is prized for both its culinary and medicinal applications, and is native to the Mediterranean region but is cultivated world-wide.

**CAPRYLIC ACID** is an antifungal agent that inhibits the growth of Candida albicans. Caprylic Acid is derived from coconut oil and is effective against a wide range of pathogens, including Candida albicans, Cryptococcus neoformans, and Aspergillus fumigatus. It has been shown to be effective in the treatment of chronic infections caused by Candida albicans, including oral candidiasis, vaginal candidiasis, and thrush.

**BERBERINE** is an alkaloid derived from the rhizomes of Berberis Aristata. It is a natural antifungal agent that inhibits the growth of Candida albicans. Berberine has been shown to be effective against a variety of pathogens, including Helicobacter pylori, Escherichia coli, and Staphylococcus aureus.

**PUMPKIN SEED EXTRACT** is derived from the seeds of the pumpkin plant and contains a variety of nutrients, including lutein, zeaxanthin, and phytosterols. It has been shown to be effective against a variety of pathogens, including Candida albicans, Helicobacter pylori, and Staphylococcus aureus.

**OROGENO AERIAL EXTRACT** is derived from the leaves of oregano, which is a popular herb used in many cuisines around the world. It contains a variety of compounds, including thymol, carvacrol, and linalool, which have been shown to be effective against a variety of pathogens, including Candida albicans, Helicobacter pylori, and Staphylococcus aureus.

**SUGGESTED USE:** As a dietary supplement, take 4 caps per day in the AM, or as directed by your healthcare practitioner.

**CAUTION:** If you are pregnant or nursing, consult your healthcare practitioner before taking this product.
